PROFILE

Full-Stack and Mobile Application Developer graduating from the Computer Systems Technology (CST) program at BCIT in May 2026. Skilled in React Native, TypeScript, JavaScript, Node.js, Express.js, PostgreSQL, MongoDB, REST APIs, and AI-integrated applications. Experienced in mobile development, backend architecture, microservices, and full software development lifecycle practices. Brings 10+ years of technical support, system integration, troubleshooting, and problem-solving experience.

TECHNICAL SKILLS

Programming Languages: Java, TypeScript, JavaScript, Python, C, C++, C#, SQL, Bash/Shell

Mobile Development: React Native, Expo, React Navigation, Expo Router, Mobile UI Development, Responsive Design, Cross-Platform Development, JavaFX, Progressive Web Apps, Mobile Component Architecture

Web Development: HTML5, CSS3, JavaScript, ReactJS, Node.js, Express.js, REST APIs, Web APIs, ASP.NET Core MVC, JWT Authentication, WebSockets, Responsive Web Design, Client-Server Architecture

Backend & APIs: Node.js, Express.js, REST APIs, Web APIs, JWT Authentication, WebSockets, ASP.NET Core MVC

Database Technologies: PostgreSQL, MongoDB, MySQL, SQLite, SQL Server Concepts, Oracle Concepts, Stored Procedures, Triggers, DBC/ODBC

Networking & Systems: TCP/IP, UDP, Concurrent Programming, Thread Sync, Linux, Windows, macOS

QA & Testing: Selenium, NUnit, Unit Testing, pytest, Debugging, Performance Profiling, Memory Analysis, Black Box Testing, TDD Concepts

Tools & Platforms: Git, GitHub, Docker, Postman, Figma, Trello, Xcode, VS Code

Software Engineering: OOP, MVC, Microservices, Agile/Scrum, CI/CD, SDLC, Service-Oriented Architecture, Component-Based Design

SELECTED SOFTWARE PROJECTS

Fall Protection Plan Mobile Application | *Team Lead & Full-Stack Developer*

- Led planning, architecture, integration, and delivery across the development lifecycle.
- Developed interactive worksite diagrams and hazard tagging using React Native and Expo.
- Integrated AI hazard detection and rescue recommendation workflows.
- Implemented PDF export and snapshot generation features.

EquiTip Platform Modernization | *Team Lead & Backend Architecture Contributor*

- Contributed to backend architecture and microservices modernization strategy.
- Supported migration planning from Xano to PostgreSQL and service redesign.
- Implemented REST APIs, JWT authentication, and backend integrations.
- Developed and tested backend calculation services using Python.

PathPal Accessibility App | *Team Lead & Frontend Developer*

- Led development coordination and team collaboration for an accessibility-focused mapping application.
- Built accessibility mapping functionality using crowd-sourced data and GPX export features.
- Contributed to UI implementation, route accessibility functionality, and application usability improvements.

Accessibility Intelligence System | *Personal Full-Stack Development Project*

- Designed and developed an AI-driven accessibility analysis platform.
- Built a React Native mobile application with sensor and GPS data collection.
- Implemented microservices architecture and AI-assisted recommendation workflows.
- Developed analytics, route visualization, reporting, and export capabilities.
- Designed and developed a research dashboard with maps, analytics, reporting, and AI research summaries.
- Implemented route visualization, risk hotspot mapping, session history, and export functionality.
- Planned scalable architecture for future integration of external sensors and LiDAR technologies.

EXPERIENCE

- Technical Lead & Full-Stack Developer

2024 - Present

BCIT Industry & Academic Software Projects

Led and coordinated multiple Agile software development projects involving mobile applications, backend integration, AI-assisted systems, accessibility-focused platforms, and scalable microservices architectures.
- Academic Upgrading & BCIT CST Preparation

2020 - 2024

Post-Secondary Preparation Studies

Completed academic upgrading and prerequisite studies in preparation for admission into BCIT Computer Systems Technology (CST).
- Freelance Remote Technical Support Specialist

2015 - 2020

Freelance & Contract-Based Technical Support

Provided remote technical support, troubleshooting, hardware/software diagnostics, and customer-focused technical assistance for multiple clients and organizations.
- IT Desktop & Technical Support Specialist

2010 - 2015

Ministry of Labor & Ministry of Human Rights — Baghdad, Iraq

Supported 50+ users with technical troubleshooting and system maintenance. Diagnosed and resolved hardware, software, and network-related issues. Delivered technical training, customer support, and maintained computer systems and peripherals.
- Self-Employed — Computer Center Management

2007 - 2010

Provided technical consultations and repair services. Managed customer support and IT maintenance operations.

LEADERSHIP & COLLABORATION

- Led and coordinated academic software development projects in Agile team environments.
- Contributed to system architecture, project structure, and technical planning.
- Coordinated frontend, backend, and integration development tasks.
- Demonstrated leadership, initiative, and strong problem-solving skills.

EDUCATION

- British Columbia Institute of Technology (BCIT)

Computer Systems Technology Diploma | 2024 – May 2026
- Bachelor of Software Engineering | Baghdad, Iraq | 2007

CERTIFICATIONS

- Google IT Support Fundamentals
Google
- Python Data Structures
University of Michigan
- Programming for Everybody
University of Michigan
